

D.

| Name | Feedback | Actionable | Response |
|------------|---|------------|--|
| Heather D. | The About page FAQ should be a bit tidier than just a paragraph of questions and information | actionable | Create a question-and-answer accordion-style FAQ. Have a drop-down for each question with the answer. |
| George P. | All of the images are squished vertically, creating a very cluttered feeling with no breathing room between each image. | actionable | Add page breaks/spacing between pictures and texts vertically to give a more open and less cluttered feeling. |
| Derek L. | Having to scroll all the way back up to select another page is a bit tedious. The home page has the convenient "learn more" links which take to to respective pages, but having a way to always click the nav buttons would help for other pages. | actionable | Make the navigation bar fixed to the screen so it is always at the top when scrolling. This will allow for easy clicking between pages |
